Problem Statement:

Create your own resume with independent pages for academics, hobbies, recognition/awards, family, personal interests, etc.,

Project Report: Personal Resume Website

1. Introduction:

   The Personal Resume Website project aims to create an online platform to showcase my professional profile. As a recent graduate with a Bachelor's degree in Computer Science & Engineering, this website serves as an interactive representation of my academic achievements, skills, experiences, and career objectives.

2. Project Scope:

   The project scope includes designing and developing a responsive website with multiple sections to highlight various aspects of my resume. These sections include personal details, academics, internships, projects, skills, certifications, hobbies, and personal interests.

3. Objectives:

   - To create an online platform for me to showcase my professional profile effectively.
   - To provide detailed information about my academic background, skills, and experiences.
   - To highlight my career objectives and aspirations to potential employers and collaborators.
   - To ensure the website is responsive and accessible across different devices and screen sizes.

4. Key Features:

   - Navigation Menu: Provides easy access to different sections of the website.
   - Profile Picture: Displays my profile picture prominently on the homepage.
   - Objective Section: Describes my career objectives, academic background, and skills.
   - Technical Skills: Lists my technical skills, including programming languages and tools.
   - Internship Experience: Highlights my internship experience and contributions to software development projects.

- Responsive Design: Ensures the website is optimized for viewing across various devices.

5. Technologies Used:
   - HTML5 and CSS3 for front-end development.
   - JavaScript for interactive elements.
   - Responsive design techniques using media queries.

6. Project Execution:
   - Requirement Analysis: Identified the sections and features required for my resume website.
   - Design Phase: Created wireframes and design mockups for each section of the website.
   - Development: Implemented the website layout, styling, and interactive elements using HTML, CSS, and JavaScript.
   - Content Population: Added content such as text descriptions, images, and links to relevant sections.
   - Testing: Conducted thorough testing to ensure the website functions correctly and is responsive across different devices.
   - Deployment: Deployed the website to a hosting platform for public access.

7.Conclusion:

The Personal Resume Website project has successfully achieved its objectives of creating an online platform to showcase my professional profile. The website provides comprehensive information about my academic background, skills, experiences, and career objectives in an interactive and visually appealing manner. The responsive design ensures optimal viewing experience for users across various devices, enhancing accessibility and usability.

RESUME

KAGGOLA ROJA

Objective

As a recent graduate with a Bachelor's degree in Computer Science & Engineering, I am eager to embark on a dynamic career journey where I can leverage my academic foundation, innovative mindset, and passion
for the technical field to contribute meaningfully to a progressive organization. With a solid understanding of Programming Languages and Tools, honed through rigorous coursework and hands-on projects,

- Py..., JavaScript
- Database Management Systems (SQL, NoSQL)
- Web Development (HTML/CSS, React, Node.js)
- Software Development Lifecycle (SDLC) methodologies
- Version Control Systems (Git)
- Agile development practices

In addition to my technical skills, I have strong communication and teamwork abilities, developed through collaborative projects and presentations during my academic tenure. Furthermore,
I have completed internships at resolution minds, where I gained practical experience in software development and contributed to the development of a new web application. I am driven by a relentless pursuit
of excellence and continuous learning, seeking opportunities to collaborate with diverse teams, tackle complex problems, and drive impactful solutions that promote business growth and enhance customer satisfaction.
My goal is to cultivate a fulfilling career path where I can continuously evolve, make a positive impact, and grow both personally and professionally, while making significant contributions to the success of the
organization I join.

INTERNSHIP

Software Engineering Intern

RESOLUTION MINDS(software solutions)

August 28th to October 14th,2023

Worked closely to enhance learning and developing new skills and gaining hands on knowledge

Participated for creating user elements that user interact with,ensuring that design is responsive

Implemented new features using languages such as HTML and CSS,javascript

PROJECTS

calculator

Provide a clean and intuitive interface that allows users to easily input numbers and operators.

Ensuring that calculator is responsive for devices,including desktops,tablets and mobile phones.

Ecommerce website

To structure product pages,category pages,check out pages etc.,

develope wireframes and mockcups for the website layout and user interfaces.

Connect 4 game

implemented a simple and ineteractive two-player game.

to allow users to interact the gamw by clicking on columns to drop their discs.

HOBBIES

Programming

Engaging in coding projects or learning new programming languages to enhance problem-solving skills, logical thinking, and software development abilities. This hobby demonstrates a passion for technology and a dedication to continuous learning in the field of computer science.

Writing

Expressing thoughts, emotions, and stories through written words, whether it's crafting beautiful poetry, creating fictional worlds, or sharing real-life experiences and knowledge through non-fiction writing.

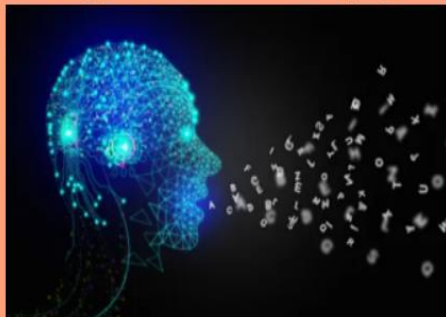

Web Development

Creating websites or web applications using HTML, CSS, JavaScript, and frameworks like React or Angular. This hobby showcases proficiency in front-end development, UI/UX design principles,and the ability to build user-friendly digital experiences.

Learning new languages

Exploring different cultures and expanding one's horizons by learning new languages, opening doors to new opportunities, connections, and perspectives on the world.
